

The Cannonball Tree

(Couroupita guianensis)

The Cannonball Tree lives in the World of Plants at Gardens by the Bay.

Did you know that each part of the tree has a special role to play?

Match each role to the right tree part to complete the poster.

[Empty box for labeling the canopy]

[Empty box for labeling the trunk]

[Empty box for labeling the flowers]

[Empty box for labeling the fruits]

[Empty box for labeling the roots]

Roots

Roots help the tree to drink water. They also help the tree to hold on tightly to the ground.

Flowers

Flowers bring animals and insects to the tree to help make fruits and seeds.

Leaves

The tree breathes through its leaves and they also help it to make food.

Trunk

The trunk helps the tree to stand upright.

Fruits

Fruits help the tree to make baby trees by keeping the seeds safe inside them.
